WORK EXPERIENCE

Full Stack Developer

Qualysoft Romania (Smarttech247)

05/2023 - 06/2025, Bucharest, Romania

- Developed from scratch a Java + Quarkus application and AWS Lambda functions, deployed on AWS.
- Worked primarily on backend development, while also contributing to frontend features using ReactJS.
- Used PostgreSQL, Flyway, Docker, OpenAI, AWS Services (like Cognito, AmazonQ, CloudWatch, S3 Buckets), webhooks and different APIs to extract data;
- Performed unit and integration testing in a Quarkus environment using JUnit 5, Mockito, and WireMock for external service simulation, ensuring reliable application functionality.
- Collaborated with a multicultural team based in Cork, Ireland.

Java Developer

Cognyte Romania

06/2021 – 05/2023, Bucharest, Romania

- Developed features and fixed bugs in a Java monolithic application deployed on JBOSS, as well as Spring Boot microservices running in Docker.
- Utilized REST, Kafka, and TCP protocols for inter-application communication, with Sybase and Elasticsearch for data storage.
- Demonstrated strong debugging and problem-solving skills to ensure application stability and performance.
- Conducted technical trainings and onboarding sessions for new employees, sharing knowledge on various technologies.

Full Stack Developer

METRO SYSTEMS Romania

01/2018 – 06/2021, Bucharest, Romania

- Developed backend applications using Java and Spring deployed in Docker containers, orchestrated by Kubernetes; working with both private and public cloud (GCP);
- Developed frontend applications using Angular and React;
- Used Elasticsearch for log management. Monitored applications using Kibana, Grafana. CI/CD with Jenkins and Ansible;
- Worked with both SQL and NoSQL databases, such as MariaDB and Cassandra;
- Awarded Third Prize at Innovation Days for an IoT project developed with the team.
- Completed JSAcademy internal learning path modules: JavaScript Fundamentals and Advanced.
- Achieved Third Prize in “Crack Vlad's Challenge,” an internal hacking contest.

Full Stack Developer Intern

METRO SYSTEMS Romania

02/2017 - 01/2018, Bucharest, Romania

- Worked with a team in an Agile environment from a multinational company; Successfully completed learning tasks and understanding Middleware principles; Developing applications using IBM WebSphere;
- Developed applications using Java, Camel and JBOSS;
- Second prize in Security Day, an internal and individual contest regarding IT security fundamentals.

ORGANIZATIONS

"Ajungem Mari" (educational program for children from foster care and disadvantaged backgrounds) (10/2016 - 10/2017)

Coordinator member

"SiSC" (Students Union of Cybernetics) (11/2015 - 11/2016)

IT Department Member

EDUCATION

IT&C Security Master

Bucharest University of Economic Studies

10/2018 - 10/2020,

Bucharest, Romania

Faculty of Cybernetics, Statistics and Informatics

Bucharest University of Economic Studies

10/2015 - 10/2018,

Bucharest, Romania

Mathematics-Informatics

Mircea cel Batran National College

Ramnicu Valcea Romania

PERSONAL PROJECTS

Clear coin wallet application (04/2021 - 05/2021)

<https://bitbucket.org/aidaghergus/workspace/projects/CLEAR>

- Develop a wallet application and allow transfer operations from a Web Interface..
Backend Technologies: Java, Spring, Maven, MongoDB, Lombok, MapStruct, JUnit.
Frontend Technologies: ReactJS, Redux, AntDesign

Securing Transactions in Barter Exchange Applications Using Blockchain Technology (01/2020 - 06/2020)

<https://bitbucket.org/aidaghergus/workspace/projects/BAR>

- Created a hybrid decentralized application for secure online bartering, leveraging blockchain technology to ensure transaction integrity.
Solidity, Truffle, Ganache, web3js. Web interface developed with ReactJS and AntDesign;
communication from browser to the blockchain network through Metamask.

Manager for indexing and statistical analysis of online media content (01/2018 - 06/2018)

<https://bitbucket.org/aidaghergus/workspace/projects/SER>

- Designed an algorithm using IBM Watson, Spring Social Twitter and Crawler4j to rank series/movies based on multiple indicators, improving decision-making for users.
- Backend Technologies: Java, Spring, Maven, MySQL. Frontend Technologies: ReactJS, Bootstrap.

CONFERENCES

Codecamp Romania

10/2021

- Title: How to write code 2x faster
- Presentation about shortcuts in IntelliJ.

CERTIFICATES

- Oracle Database Design and SQL;
- Oracle Database PL/SQL Developer;
- ECDL/ICDL;
- CISCO-IT Essentials.
- ReactJS Fundamentals+Advanced;
- Leadership Program - She Leads Tomorrow
